The Fifth Royal Marsden Lung Cancer Symposium

Dear Colleagues,

We would like to invite you to a state-of-the-art symposium focusing on recent advances in the diagnosis and treatment of lung cancer.

This fifth Royal Marsden lung cancer symposium will tackle burning issues and key challenges facing clinicians treating patients with lung cancer. We have assembled a combination of highly knowledgeable faculty members who will be talking on topics including, advances in screening, epidemiology, diagnostics and systemic and local therapies in both NSCLC and SCLC. It will also involve discussions and debate on the pros and cons of treating oligometastatic NSCLC radically, and give a year in overview.

This conference will be of interest to any medical, nursing or other healthcare professionals involved in the treatment and management of patients with lung cancer. This is a unique opportunity to listen to the experts with ample opportunity for interactive discussions.

We very much hope you will join us for this exciting and challenging event.
