Royal Marsden Testicular and Bladder Cancer Meeting – Improving Outcomes with Multidisciplinary Care

Introduction

Dear Colleagues

It is with pleasure that we invite you to participate in a very exciting Testicular and Bladder Cancer meeting. The Urological Oncology Educational Day is an annual event with this meeting alternating with Prostate and Renal Cancers which will next be held in October 2017.

Testicular cancer is a disease largely restricted to young adult men whereas bladder cancer affects both sexes at a much later stage in life. Despite their differences they are both previously lethal diseases now characterised by successful outcomes associated with multimodality care combining surgery, chemotherapy and radiotherapy for locally advanced and metastatic disease as well as rigorous surveillance strategies for low stage tumours.

In both diseases treatments may be associated with consequences that may impact on quality of life. These include functional and body image issues which may influence treatment decisions. Consequently management is underpinned by a multidisciplinary approach dealing with both effective treatment of the cancer as well as the side effects of treatment. Balancing these, at times, conflicting issues is thus one of the major challenges in caring for patients with these conditions.

A specific challenge for clinicians is to ensure that radical therapies, usually requiring a combination of modalities, is appropriately provided to optimise outcome but balanced by the need to avoid overtreatment in selected patients who will experience unnecessary treatment related morbidity.

Care is thus underpinned by note only multispecialty management but also tailoring options to individual patients to ensure that the best long term outcome both during and after completion of treatment.

This year we are privileged to have the opening key note address by Dr Stephen Watson who will provide valuable insight into the impacts that multimodality treatment has on the patient and family – physically, emotionally and psychologically. The afternoon lecture will be delivered by a patient who has undergone bladder preservation for high risk disease, providing unique insight into a very personal journey.

As with previous meetings each lecture will be followed by interactive case discussions involving the faculty and audience to highlight treatment dilemmas confronting patients with both these diseases and the pivotal points to be considered in their immediate and long term care.

Professor David Nicol
Consultant Urological Surgeon/Chief Surgeon,
The Royal Marsden NHS Foundation Trust

Mr. Pardeep Kumar
Consultant Urological Surgeon,
The Royal Marsden NHS Foundation Trust

Conference Aim

The aim of the study day will be to highlight the treatment options for patients with both testicular and bladder cancer. The objective will be to cover both early stage and advanced disease, including the side effects of treatments for advanced disease as well as strategies to identify and manage the subset of patients with early disease who at risk of disease progression.

Topics to Include

Topics covered will include historical perspective of these cancers and how their management has evolved to both improve survival and the consequences of treatment. Case based discussions with expert panels and audience interaction will be used to outline treatment strategies for individual patients with particular emphasis on the contributions of specialists required to achieve the best outcomes in both terms of quality of life and survival.

Target Audience

The talks and discussions will be targeted at a multidisciplinary audience, medical and nursing, trainee and specialist and that at the end of the day attendees will have an up to date understanding of the complex issues and current management strategies for both testicular and bladder cancer.

The Royal Marsden Conference Team

The Royal Marsden Conference Team provides world-class medical conferences, study and training days for The Royal Marsden and other organisations.

In addition to organising and delivering our distinguished programme, we are an experienced and dedicated event management team, who organise conferences both at The Royal Marsden and at venues in London and across the UK. We exceed expectations by taking care of everything from venue sourcing, catering, and audio-visual requirements through to the production of professional and detailed delegate packs. Our team negotiates the best deals for events organisers on venue hire, sponsorship and advertising by using the contacts we've built up over the years.

We really do take the stress out of organising events, and can get involved as much or as little as you want. We also offer venue hire from our high profile facilities at The Royal Marsden in Chelsea.

We're proud to be part of The Royal Marsden and are always looking for ways to enhance the conference experience for delegates.

We’re a team of specialists in conferences and events management.
